DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-8 (in part), 10-17 (in part), 22 (in part), 36 (in part), and 42-43 (in part), drawn to pyridine compounds and pharmaceutical use (A in Formula I = N).

Group II, claim(s) 1-8 (in part), 9, 10-17 (in part), 18-21, 22 (in part), 23-27, 32-35, 36 (in part), 37-41 and 42-43 (in part), drawn to phenyl compounds and pharmaceutical use (A in Formula I = C).

Group III, claim(s) 28-31 (in part), drawn to a method of imaging amyloid deposits (A in Formula I = N).

Group IV, claim(s) 28-31 (in part), drawn to a method of imaging amyloid deposits (A in Formula I = C).

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The special technical feature of Group I is a pyridine ring (six-membered ring with one N) and is different from the special technical feature of Group II, since this technical feature is not present in other groups. The special technical feature of Group II is a phenyl ring (i.e. non-heterocyclic ring with a six-membered ring with no heteroatoms), and this feature is not present in Group I. The special technical feature of Groups III and IV are different from

Art Unit: 1624

Groups I-II (compounds and pharmaceutical use), since they are drawn to a method of imaging using labeled compounds. The compounds of Group III and Group IV are labeled and the method of imaging is different from pharmaceutical use. Group III (method of imaging amyloid deposits using pyridine compounds) and Group IV (method of imaging amyloid deposits using phenyl compounds) are different, since the special technical features of each Group is different one from the other (see above).

In addition, applicants are required to elect a single disclosed species.

3. A telephone call was made to Ms. Loraine Ling on July 28, 2003 and August 1, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
